Contract No. 75Q80119C00008

December 2023

1.0 Introduction to Release Notes for v2023.0.1

The Agency for Healthcare Research and Quality (AHRQ) announces a minor release of the AHRQ Quality Indicators (QI) software for CloudQI Patient Safety Indicators (PSI) ^{Beta} Version 2023 (v2023.0.1, December 2023). This is an update to the v2023 software that applies to the CloudQI PSI ^{Beta} application.

The following item summarizes the changes in v2023.0.1 from v2023.

1.1 Fixes Issue with Loading Quoted Data Values

Version 2023.0.1 addresses an issue where the v2023 CloudQI PSI ^{Beta} software fails to process input data files having quoted values. While the application provides an option to process input data files with quoted values (e.g., “value”), the software will not load the input data file when data values are quoted, even when this option is enabled in the software. This issue is resolved in the v2023.0.1 minor release and the input data files with quoted values will be correctly processed.

For additional information about [CloudQI PSI ^{Beta}](#), see the [v2023 Information Sheet](#).
