

Perioperative Hemorrhage or Hematoma Rate Technical Specifications

Patient Safety Indicators #27 (PSI #27)
AHRQ Quality Indicators™, Version 4.5, May 2013
Area-Level Indicator
Type of Score: Rate

Description

Perioperative hemorrhage or hematoma cases with control of perioperative hemorrhage, drainage of hematoma, or a miscellaneous hemorrhage- or hematoma-related procedure following surgery per 100,000 population ages 18 years and older. Excludes cases with a diagnosis of coagulation disorder and obstetric cases.

[NOTE: The software provides the rate per population. However, common practice reports the measure as per 100,000 population. The user must multiply the rate obtained from the software by 100,000 to report events per 100,000 population.]

Numerator

Discharges, for patients ages 18 years and older, with either:

- any secondary ICD-9-CM diagnosis codes for perioperative hemorrhage and any-listed ICD-9-CM procedure codes for control of perioperative hemorrhage; or
- any secondary ICD-9-CM diagnosis codes for perioperative hemorrhage and any-listed ICD-9-CM procedure codes for drainage of hematoma; or
- any secondary ICD-9-CM diagnosis codes for perioperative hemorrhage and any-listed ICD-9-CM procedure codes for miscellaneous hemorrhage- or hematoma-related procedure; or
- any secondary ICD-9-CM diagnosis codes for perioperative hematoma and any-listed ICD-9-CM procedure codes for control of perioperative hemorrhage; or
- any secondary ICD-9-CM diagnosis codes for perioperative hematoma and any-listed ICD-9-CM procedure codes for drainage of hematoma; or
- any secondary ICD-9-CM diagnosis codes for perioperative hematoma and any-listed ICD-9-CM procedure codes for miscellaneous hemorrhage or hematoma-related procedure

ICD-9-CM Perioperative hemorrhage diagnosis code:

99811 HEMORRHAGE COMPLIC PROC

ICD-9-CM Perioperative hematoma diagnosis code:

99812 HEMATOMA COMPLIC PROC

ICD-9-CM Control of perioperative hemorrhage procedure codes:

2863	CONG DEF CLOT FACTOR NEC	2867	ACQ COAGUL FACTOR DEF
2864	VON WILLEBRAND'S DISEASE	2869	COAGUL DEFECT NEC NOS

Denominator

Population ages 18 years and older in metropolitan area[†] or county. Discharges in the numerator are assigned to the denominator based on the metropolitan area or county of the patient residence, not the metropolitan area or county of the hospital where the discharge occurred.

[†] The term “metropolitan area” (MA) was adopted by the U.S. Census in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs) and primary metropolitan statistical areas (PMSAs). In addition, “area” could refer to either 1) FIPS county, 2) modified FIPS county, 3) 1999 OMB Metropolitan Statistical Area or 4) 2003 OMB Metropolitan Statistical Area. Micropolitan Statistical Areas are not used in the QI software.
