PSI #03 Pressure Ulcer Rate

DESCRIPTION

Stage III or IV pressure ulcers or unstageable (secondary diagnosis) per 1,000 discharges among surgical or medical patients ages 18 years and older. Excludes stays less than 5 days; cases with a principal diagnosis of pressure ulcer; cases with a secondary diagnosis of Stage III or IV pressure ulcer or unstageable that is present on admission; cases with diseases of the skin, subcutaneous tissue and breast; obstetric cases; cases with hemiplegia, paraplegia, quadriplegia, spina bifida, or anoxic brain damage; cases in which debridement or pedicle graft is the only operating room procedure; discharges with debridement or pedicle graft before or on the same day as the major operating room procedure; and transfers from another facility.

[NOTE: The software provides the rate per hospital discharge. However, common practice reports the measure as per 1,000 discharges. The user must multiply the rate obtained from the software by 1,000 to report events per 1,000 hospital discharges.]

[Note: Pressure ulcer staging codes were introduced October 1, 2007. For discharges prior to this date, only pressure ulcer diagnosis codes 707.0x are required for inclusion in the numerator. As a result all stages of pressure ulcers are included in the numerator for data prior to October 1, 2007.]

[Note: Codes that are no longer valid may be retained for compatibility with historical data. These codes will have no impact on numerator counts in more recent data using only currently valid codes.]
