Hospital-Level Indicator

Type of Score: Rate

Prepared by:

DESCRIPTION

In-hospital deaths per 1,000 surgical inpatients who experienced a postoperative complication and then died within 30-days from the date of their first "operating room" procedure and before discharge from the hospital. Based on the concept of failure-to-rescue, this measure estimates the probability of death given a postoperative complication.

NUMERATOR

Number of reported in-hospital deaths (DISP=20) within 30 days from the date of the first operating room procedure (**Appendix C: ORPROC**), among discharges meeting the inclusion and exclusion rules for the denominator.

[Appendix C - Operating room procedure codes](#)

DENOMINATOR OVERALL
