DESCRIPTION

Hospitalizations with a principal diagnosis of gastroenteritis, or with a principal diagnosis of dehydration plus a secondary diagnosis of gastroenteritis, per 100,000 population, ages 3 months to 17 years. Excludes hospitalizations transferred from another facility, hospitalizations with gastrointestinal abnormalities, hospitalizations with bacterial gastroenteritis, and obstetric hospitalizations.

[NOTE: The software provides the rate per population. However, common practice reports the measure as per 100,000 population. The user must multiply the rate obtained from the software by 100,000 to report hospitalizations per 100,000 population.]

NUMERATOR

Hospital discharges for patients ages 3 months through 17 years, with either:

- a principal ICD-10-CM diagnosis code for gastroenteritis (**ACPGASD***)
- a secondary ICD-10-CM diagnosis code for gastroenteritis (**ACPGASD***) and a principal ICD-10-CM diagnosis code for dehydration (**ACSDEHD***)

NUMERATOR EXCLUSIONS

Exclude discharges:

- with any listed ICD-10-CM diagnosis code for gastrointestinal abnormalities (*ACGDISD**)
- with any listed ICD-10-CM diagnosis code for bacterial gastroenteritis (*ACBACGD**)
- with admission source for transferred from a different hospital or other health care facility (*Appendix J*) (ATYPE is not 4 and UB04 Admission source - 2, 3)
- with a point of origin code for transfer from a hospital, skilled nursing facility (SNF) or intermediate care facility (ICF), or other healthcare facility (*Appendix J*) (ATYPE is not 4 and UB04 Point of Origin - 4, 5, 6)
- where age in days is less than ninety days (ageday <90) or neonates (*Appendix I*) with missing age in days
- with a principal ICD-10-CM diagnosis code assigned to MDC 14 Pregnancy, Childbirth & the Puerperium (*Appendix N: MDC14PRINDX*)
- with an ungroupable DRG (DRG=999)
- with missing sex (SEX=missing), age (AGE=missing), quarter (DQTR=missing), year (YEAR=missing), principal diagnosis (DX1=missing), or county (PSTCO=missing)

[*Appendix I - Definitions of Neonate, Newborn, Normal Newborn, and Outborn*](#)

[*Appendix J - Admission Codes for Transfers*](#)

[*Appendix N - MDC 14 and 15 Principal Diagnosis Codes*](#)

DENOMINATOR

Population ages 3 months through 17 years in metropolitan area¹ or county. Discharges in the numerator are assigned to the denominator based on the metropolitan area or county of the patient residence, not the metropolitan area or county of the hospital where the discharge occurred.

¹ The denominator is extrapolated by applying a multiplicative factor to the population count for the 0 to 4 age group and combining this estimate with the counts for the other age groups in the denominator age range. The term “metropolitan area” (MA) was adopted by the U.S. Census in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). In addition, “area” could refer to either 1) FIPS county, 2) modified FIPS county, 3) 1999 OMB Metropolitan Statistical Area, or 4) 2003 OMB Metropolitan Statistical Area. Micropolitan Statistical Areas are not used in the AHRQ QI software.
