AHRQ Quality Indicators, Version 4.3, August 2011
(Revised September 1, 2011)

Prepared for:

Agency for Healthcare Research and Quality
U.S. Department of Health and Human Services
540 Gaither Road
Rockville, MD 20850
<http://www.qualityindicators.ahrq.gov>

Contract No. 290-04-0020 (AHRQ SQI-II)

Prepared by:

Battelle
505 King Avenue
Columbus, OH 43201

Version 4.3a is a maintenance release of Version 4.3. The differences between the two versions are:

- Version 4.3a includes Version 29 of the Limited License edition of the 3MTM APR-DRG Grouper. This grouper corrects an issue found in Version 28 of the Limited License edition of the 3MTM APR-DRG Grouper. The grouper is only used with the Inpatient Quality Indicator (IQI) mortality measures. Version 4.3 includes Version 28 of the Limited License edition of the 3MTM APR-DRG Grouper, which was incorrectly assigning a Risk of Mortality (ROM) subclass for cases dated on or after 10/1/10.
- Version 4.3a allows users to calculate area-level indicators for years 2010 and 2011, correcting an issue previously identified in Version 4.3.

All other aspects of the software, including measure specifications, remain the same. Thus this document (related to Version 4.3) remains unchanged.

Contents

Appendix A – Operating Room Procedure Codes	3
Appendix B – Surgical DRGs	24
Appendix C – Surgical MS-DRGs	29
Appendix D – Medical DRGs	36
Appendix E – Medical MS-DRGs	40
Appendix F – High-Risk Immunocompromised States	46
Appendix G – Intermediate-Risk Immunocompromised States	49
Appendix H – Infection Diagnosis Codes	51
Appendix I – Definitions of Neonate, Newborn, Normal Newborn, and Outborn	58
Appendix J – Admission Codes for Transfers	59
Appendix K – Stratification	60
Appendix L – Low Birth Weight Categories	62

Appendix A – Operating Room Procedure Codes

The ICD-9-CM codes added after January 17, 2005 are identified by the date of introduction, e.g., OCT04, after the code label.

Appendix I – Definitions of Neonate, Newborn, Normal Newborn, and Outborn

A neonate is defined as any discharge with age in days at admission between zero and 28 days (inclusive). If age in days is missing, then a neonate is defined as an admission type of newborn (SID ATYPE=4) **OR** an ICD-9-CM code for either in-hospital live birth or neonate observation and evaluation.

A newborn is defined as a “neonate” with any of the following:

- an ICD-9-CM code for in-hospital live birth with age in days equal to 0 or missing
- an admission type of newborn (SID ATYPE=4) with age in days equal to 0 without a diagnosis for out-of-hospital live birth
- an admission type of newborn (SID ATYPE=4) with point of origin for Born inside this hospital

A normal newborn is defined as a “newborn” with DRG 391 or MS-DRG 795.

Outborn is defined as a “neonate” that does not meet the definition of “newborn” with either of the following:

- age in days less than 2 days and not missing
- admission type of newborn (ATYPE=4) with age in days missing or point of origin for born outside of this hospital

Newborn in Hospital Live Birth codes:

Appendix J – Admission Codes for Transfers

SID ASOURCE Codes

- 2 - Another hospital
- 3 - Another facility, including long term care

POINTOFORIGINUB04 Codes

- 4 - Transfer from a hospital
- 5 - Transfer from a Skilled Nursing Facility (SNF) or Intermediate Care Facility (ICF)
- 6 - Transfer from another health care facility

If Admission Type is newborn (ATYPE=4), POINTOFORIGINUB04 codes are as follows:

- 5- Born inside this hospital
- 6 - Born outside of this hospital

Appendix K – Stratification

The PDI software reports rates stratified by age and/or birth weight and, in some cases, by specified clinical strata. Refer to the individual Technical Specifications documents for indicator-specific stratification.

All PDIs stratify rates based on age and/or birth weight. The values of three variables related to age and weight are used in determining cases to include in the denominator. These values are also used in assigning cases to stratification categories.

Pediatric Age in Years

The values for Pediatric Age in Years include the following:

- 1 = Less than one (1) year
- 2 = 1 to 2 years
- 3 = 3 to 5 years
- 4 = 6 to 12 years
- 5 = 13 to 17 years

Age in Days

Age in Days is defined on patients less than one year. Possible values for this category are as follows:

- 0 = N/A
- 1 = 0 to 28 days
- 2 = 29 to 60 days
- 3 = 61 to 90 days
- 4 = 91 to 365 days

Birth Weight

Values assigned to Birth Weight categories are based on ICD-9-CM diagnosis codes that specify infant weight in grams. The values are as follows:

- 0 = N/A
- 1 = 0 to 499 g
- 2 = 500 to 999 g
- 3 = 1000 to 1499 g
- 4 = 1500 to 1999 g
- 5 = 2000 to 2500 g

NQI 1, Iatrogenic Pneumothorax in Neonates, stratifies rates based on the Birth Weight values of 2 to 5. PDI 5, Iatrogenic Pneumothorax, uses the values of 2 to 5 for Pediatric Age in Years as stratification categories and includes a stratification category for neonates with a Birth Weight of > 2500 g. Cases are assigned to this stratification category based on diagnosis codes. All other Provider-Level PDIs provide "Age stratified rates" as shown in Table 1.

Table 1 - Provider-level PDI Stratification Categories

Rate Category	How Assigned
Neonate, < 2000 g	Neonate = true, Birth Weight value < 5
Neonate, ≥ 2000 g	Neonate = true, Birth Weight value = 5 or diagnosis code for birth weight > 2500 g.
29 days - 364 days	Pediatric Age in Years = 1, Age in Days > 1
1 - 2 years	Pediatric Age in Years = 2
3 - 5 years	Pediatric Age in Years = 3
6 - 12 years	Pediatric Age in Years = 4
13 - 17 years	Pediatric Age in Years = 5

The "Age stratified rates" categories for Area-level PDIs vary, as shown in Table 2.

Table 2 - Area-level PDI Categories

Rate Category	How Assigned	PDI 14	PDI 15	PDI 16	PDI 17	PDI 18
91 days - 364 days	Pediatric Age in Years = 1, Age in Days = 4			Y		Y
2 years	Value of Data Element "Age" = 2	Y				
1-2 years	Pediatric Age in Years = 2			Y	Y	Y
3 - 5 years	Pediatric Age in Years = 3	Y		Y	Y	Y
6 - 12 years	Pediatric Age in Years = 4	Y	Y	Y	Y	Y
13 - 17 years	Pediatric Age in Years = 5	Y	Y	Y	Y	Y
