

Patient Safety Indicator 15 (PSI 15) Abdominopelvic Accidental Puncture or Laceration Rate

July 2022

Hospital-Level Indicator

Type of Score: Rate

Prepared by:

Agency for Healthcare Research and Quality

U.S. Department of Health and Human Services

qualityindicators.ahrq.gov

DESCRIPTION

Hospital discharges with accidental punctures or lacerations (secondary diagnosis) per 1,000 discharges for patients ages 18 years and older, who have undergone an abdominopelvic procedure in which a second abdominopelvic procedure occurs one or more days after the index abdominopelvic procedure. Excludes discharges with accidental puncture or laceration as principal diagnosis, discharges with accidental puncture or laceration as a secondary diagnosis present on admission; discharges in which the index and/or all subsequent abdominopelvic procedure dates date(s) is/are missing; and obstetric discharges.

[NOTE: The software provides the rate per hospital discharge. However, common practice reports the measure as per 1,000 discharges. The user must multiply the rate obtained from the software by 1,000 to report events per 1,000 hospital discharges.]

NUMERATOR

Discharges, among cases meeting the inclusion and exclusion rules for the denominator, with:

- any secondary ICD-10-CM diagnosis code for accidental puncture or laceration during an abdominopelvic procedure (*TECHNI15D**); and
- a second abdominopelvic procedure (*ABDOMI15P**) follows one or more days after an index abdominopelvic procedure (*ABDOMI15P**).

DENOMINATOR

Surgical (*Appendix E: SURGI2R*) or medical discharges (*Appendix C: MEDIC2R*), for patients ages 18 years and older, with any ICD-10-PCS procedure code for an abdominopelvic procedure (*ABDOMI15P**).

[Appendix C - Medical Discharge MS-DRGs](#)

[Appendix E - Surgical Discharge MS-DRGs](#)

DENOMINATOR EXCLUSIONS

Exclude discharges:

- with a principal ICD-10-CM diagnosis code (or secondary diagnosis present on admission) for accidental puncture or laceration during an abdominopelvic procedure (*TECHNI15D**)
- with a missing index abdominopelvic procedure date and/or missing all subsequent abdominopelvic procedure dates
- MDC 14 (pregnancy, childbirth, and puerperium)
- MDC 15 (newborns and other neonates with conditions originating in perinatal period)
- with an ungroupable DRG (DRG=999)
- with missing gender (SEX=missing), age (AGE=missing), quarter (DQTR=missing), year (YEAR=missing), or principal diagnosis (DX1=missing)
- with missing MDC (MDC=missing) when the user indicates that MDC is provided

For risk adjustment, discharges are grouped by Risk Categories based on counts of Procedure Class categories (*PRCLASS*) for all procedures performed on the date of the first qualifying abdominopelvic procedure. Risk Categories are mutually exclusive. Discharges cannot qualify for more than one category. For risk category definitions, see Patient Safety Indicators (PSI) Parameter Estimates, v2022 on the AHRQ QI website.
