March 2021

Hospital-Level Indicator

Type of Score: Rate

Prepared by:

Agency for Healthcare Research and Quality

U.S. Department of Health and Human Services

www.qualityindicators.ahrq.gov

DESCRIPTION

Postoperative respiratory failure (secondary diagnosis), prolonged mechanical ventilation, or reintubation cases per 1,000 elective surgical discharges for patients ages 18 years and older. Excludes cases with principal diagnosis for acute respiratory failure; cases with secondary diagnosis for acute respiratory failure present on admission; cases in which tracheostomy is the only operating room procedure or in which tracheostomy occurs before the first operating room procedure; cases with neuromuscular disorders; cases with laryngeal, oropharyngeal or craniofacial surgery involving significant risk of airway compromise; esophageal resection, lung cancer, lung transplant or degenerative neurological disorders; cases with respiratory or circulatory diseases; and obstetric discharges.

[NOTE: The software provides the rate per hospital discharge. However, common practice reports the measure as per 1,000 discharges. The user must multiply the rate obtained from the software by 1,000 to report events per 1,000 hospital discharges.]

NUMERATOR

Discharges, among cases meeting the inclusion and exclusion rules for the denominator, with either:

- any secondary ICD-10-CM diagnosis code for acute respiratory failure (**ACURF2D***);
- any ICD-10-PCS procedure codes for a mechanical ventilation for 96 consecutive hours or more (**PR9672P***) that occurs zero or more days after the first major operating room procedure code (based on days from admission to procedure) if the day of both procedures is available, otherwise any secondary ICD-10-PCS procedure codes for a mechanical ventilation for 96 consecutive hours or more (**PR9672P***);
- any ICD-10-PCS procedure codes for a mechanical ventilation for less than 96 consecutive hours (**PR9671P***) (or undetermined) that occurs two or more days after the first major operating room procedure code (based on days from admission to procedure) if the day of both procedures is available, otherwise any secondary ICD-10-PCS procedure codes for a mechanical ventilation for less than 96 consecutive hours (**PR9671P***) (or undetermined);
- any ICD-10-PCS procedure codes for a reintubation (**PR9604P***) that occurs one or more days after the first major operating room procedure code (based on days from admission to procedure) if the day of both procedures is available, otherwise any secondary ICD-10-PCS procedure codes for a reintubation (**PR9604P***)

DENOMINATOR

Elective surgical discharges (**Appendix E: SURGI2R**) for patients ages 18 years and older, with any-listed ICD-10-PCS procedure codes for an operating room procedure (**Appendix A: ORPROC**).

Elective surgical discharges are defined by specific MS-DRG codes with admission type recorded as elective (SID ATYPE=3).
